

# Codebook for COVID-19 Future Survey Wave 3 Main (Wave 1B Only)

## COVID-19 and the Future Study

April 15, 2022

## Introduction

This is the codebook for Wave 3 of the [COVID-19 and the Future Study](#) data, version 3.0.0b6, generated April 15, 2022. This version of the data does not contain respondent email addresses, but may contain other personal information in free text fields, so is not suitable for public release.

This Wave 3 data can be linked with Wave 1 data (version 1.0.0 or later) using the `resp_id` field. This data is not really useful without the Wave 1 data, as many questions were only asked of Wave 3 respondents if they reported a change since Wave 1.

This codebook goes with the data files that have the following SHA-256 hashes (a SHA-256 hash is a way of verifying a file has not been modified). The `labels` file contains the column labels for the variables in the dataset.
